**Knowledgeable:** *PostgreSQL, Express, Thunder Client, SQL, JSON, RESTful*

## TECHNICAL PROJECTS

**LevelUp-Gaming Review | Frontend Developer** | July/2023 | <https://levelup-games.netlify.app/>

- Developed with the PERN stack, PostgreSQL, Express, React and Node.js.
- Designed and implemented unauthenticated, authenticated, and administrative views and capabilities.
- Implemented HTTP Methods (GET/POST/PUT/DELETE) and handling of asynchronous coding from API built by the backend team.

**Stranger's Things | Frontend Developer** | June/2023 | <https://strangerthingsproject.netlify.app/>

- Demonstrated the usage of HTTP Methods (GET/POST/DELETE) and handling of asynchronous coding for request.
- Designed and implemented authenticated and unauthenticated user view and capabilities.

## EXPERIENCE

**Assistant Program Manager | Fincantieri Marine Systems** | Jacksonville, FL

May/2021 - March/2023

- Assisted with the preparation and maintenance of complex contracts, projects, and tasks to determine and maintain the most cost effective method of accomplishing work for the Department of Defense. Contracts ranged in value from \$5 to \$20 million.
- Prepared service quotations for 15 Littoral Combat Ships (LCS) that are managed throughout the nation. The services provided were for the maintenance or repair of the Ship Service Diesel Generators onboard this particular ship class.
- Processed contracts/orders received in response to submitted service quotes within 24hrs. This allowed the execution of the services requested to begin immediately.
- Monitored the navy vessel throughout their deployments to ensure all generators are working properly.
- Ensured all contract deliverables have been provided prior to closing the project.

**Environmental, Health & Safety Coordinator | Epsilon Systems Solutions** | Jacksonville, FL

July/2018 - May/2021

- Provided environmental, health and safety compliance oversight for 30+ employees working aboard navy vessels.
- Managed two environmental, health, and safety technicians.
- Developed two procedures that were implemented company wide.
- Assisted Project Managers in reviewing contract requirements to ensure work is conducted accurately and safely.
- Acquired a Secret Clearance - Active.

## EDUCATION

**Fullstack Academy Web Development Bootcamp**

Software Engineering Certificate

Full-time, Full Stack Javascript Web Development Immersive

April/2023 - July/2023

**University of North Florida**

Bachelor of Science in Biology

April/2018

**Undergraduate Research in Dolphin Behavioral Ecology**

April/2017-March/2018

- Studied the occurrence of anthropogenic and natural-induced injuries on the bottlenose dolphin population in the Saint Johns River, Jacksonville, Florida.
- Completed a research paper and presented my findings for all the professors in the coastal biology department.
